Flemington Borough
NJDEP MS4 (Watershed Inventory Report)
Fact Sheet – Public Meeting #2
July 2026

Flemington Borough (and all NJ municipalities) are permitted to manage and treat municipal stormwater under **NJMS4 (Municipal Separate Storm Sewer System (MS4))** municipal permits, including but not limited to stormwater design, collection, treatment, infrastructure and maintenance activities required per its permit.

To meet its permit obligations, Flemington (and all municipalities) were required to prepare and file an **MS4 (Watershed Inventory Report)** with the NJDEP. An interim draft of this WIP Phase 1 assessment report was completed for Flemington Borough and filed prior to the January 1, 2026 regulatory deadline.

A copy of the Phase 1 assessment report is available for public review on Flemington Borough's stormwater webpage:

https://www.historicflemington.com/forms-and-documents/forms/department-documents/stormwater-management/1908-initial-draft-flemington-phase-1-wip-report/file

This current (draft) report was modified to include additional storm water infrastructure data (also obtained for Flemington Borough) and refiled with the NJDEP. Upon receipt of all public comments or NJDEP review input, this report will be finalized.

As part of the permit process, two (2) semi-annual public meetings are required to make the public aware, and to solicit questions or comments regarding the WIP plan. An initial public hearing was held on February 23, 2026. No public comments were received at that meeting.

Questions or comments regarding the WIP report may be directed to Flemington's Stormwater Coordinator (contact information below):

Terence Vogt, PE, CME
Terry.Vogt@rve,com

Two future additional phases of the WIP reporting will be necessary – the Phase 2 Watershed Assessment Report (due January 1, 2027) and the Phase 3 Watershed Improvement Plan Report (due December 31, 2027). Additional information on both of these (future) plans will be provided by NJDEP.
